-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Objections***

1. Claim 9 is objected to because of the following informalities: Claim 9 depends upon itself. Claim 9 should depend from Claim 8, which has the limitation of inspecting at least one specific area of the processed images. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 – 6, 8 – 15, and 17 – 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Enomoto (US 2003/0131080).

Enomoto discloses a makeover workflow method for a photographic processing system comprising the steps of processing the original images, inspecting the processed images, reprocessing comprising acquired the stored original image, combining the acquired image processing data and the change data and applying the image correction makeover data to the stored original image to create a corrected image. Paragraphs [0124] to [0129] specifically refer to makeover processing after inspecting the processed images. Paragraphs [0079] and [0082] discloses retrieval of stored images and data. Determining the changes to made are disclosed in paragraphs [0173] and [0176] and the images are displayed on a display means 20. The types of inspection in a particular

area, such as inspecting for red eye, are disclosed in paragraph [0089]. Paragraph [0161] discloses outputting prints using a printer 16 or other digital products.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Enomoto (US 2003/00131080) alone or in view of Robinson (US 5,194,892).

---

Enomoto does not disclose putting the makeover images or defective images in a batch for processing. Using batch processing is well known in the photofinishing art and one of ordinary skill in the art at the time the invention was made would have been motivated to use batch processing for defective images in order not to reduce the throughput of the operations. Robinson, for example, discloses a makeover station in Fig. 10.
